THE PROBLEM

Academic and training organisations face many challenges in traditional classroom-based learning, including limited flexibility and convenience, inconsistent learning experiences across different instructors, and difficulty managing and tracking student progress.

They face the pain points of limited reach and accessibility to learning materials, making it difficult for students to access high-quality content whenever and wherever they wanted.

On the other hand, academies with previous LMS also face their own set of challenges, such as limited customization options, poor user-friendliness and navigation, inadequate reporting and data analytics features, high costs and maintenance fees, and inconsistent and outdated features.

THE SOLUTION

With our customisable Learning Management System, academies can overcome all these challenges.

It provides a digital solution that simplifies classroom management and ensures students access high-quality learning materials.

It provides full customization options, making it easy for academies to tailor the tool to their needs. It is user-friendly and easy to navigate, saving time and improving the learning experience for both instructors and students.

It provides a centralized platform that simplifies the management and delivery of education. Students can access the learning content anytime and anywhere as the platform is cloud-based.

The LMS has features that track student progress and communicate with students and instructors. This allows instructors to make data-driven decisions that can improve the quality of education.

FEATURES OF OUR LMS

SELF-HOSTED ON CLOUD

Worried about installation and licenses? Sign in and you are done. Updates will automatically be made available for your LMS making your experience even better time to time.

ONLINE & FULLY CUSTOMISABLE

Make the portal of your Learning Management System, an online academy with your domain name and with yours branding and Style.

INTERACTIVE LEARNING

Easily create your courses with a series of lectures having content in video, audio, ppt, pdf, Jump Button and HTML, along with downloadable files.

It allows you to add assignments, quizzes and certifications to make it more engaging for the learners

Make these online courses free, payable or conditional and their learning content accessible to students in sequence order or random, accessible with time and for lifetime or a limited period.

MONETISE INSTANTLY

Your payment gateway or wallet gets integrated in your portal to get the payments of your course fees instantly. You won't pay any commission to us for that.

CONTENT SECURITY

We fully recognize that the content is your most prized asset and our system is fully capable to stop unauthorised copying and downloading content |

MARKETING & SALES

The LMS comes packed with tools like Chat, Coupon codes, Newsletters, Reseller Program ,etc to help you reach to more prospects

DRAG-N-DROP COURSE BUILDER

A fully drag-n-drop course builder to add, copy ,delete and arrange chapters and lectures, Quizzes and Assignments in them eases the courses. Then a drag-n-drop Lecture builder to make your-own layout with elements of Videos, Image, Audio, Jump-Buttons, HTML, Flash to add in it makes the course creation effortlessly.

OUR LEGENDRY SUPPORT

We are crazy for Success and knows that your success is our success. For support you may even talk directly to our CEO and take update of your requests.

TRACKING & REPORTS

Easily create your courses with a series of lectures having content in video, audio, ppt, pdf, Jump Button and HTML, along with downloadable files.

It allows you to add Live Classes, assignments, quizzes and certifications to make it more engaging for the learners

Make these online courses free, payable or conditional and their learning content accessible to students in sequence order or random, accessible with time and for lifetime or a limited period.

CUSTOMISATION & INTEGRATION

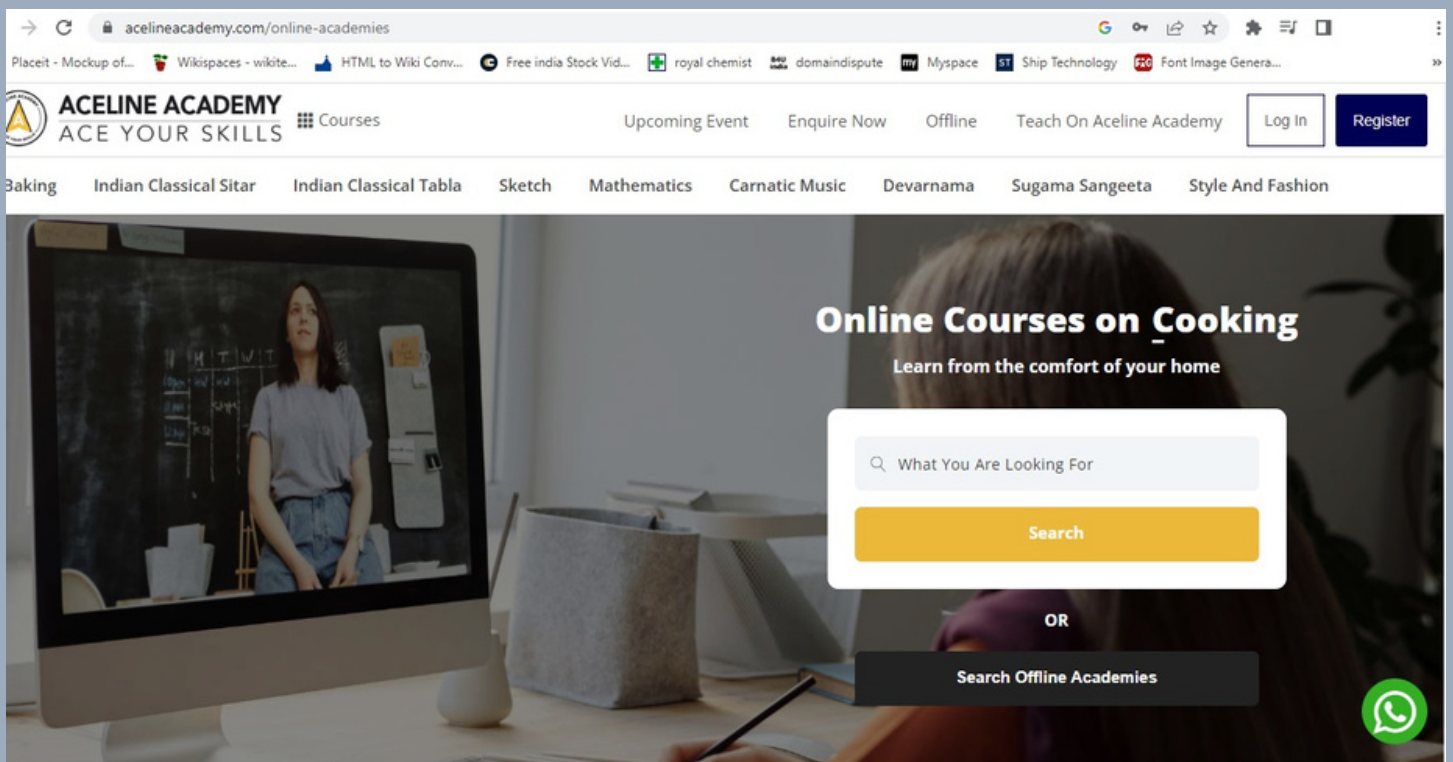

The Learning management system is inherently customisable owing to its modular structure.

Starting from the look-n-feel and design of your online academy to the addition of extra modules or integration of 3rd party software with our LMS software, nearly everything is possible, owing to the individual API "tentacles" attached to each constituent module of the system.

CLIENT SUCCESS STORIES

How Our LMS Helped Achieve Incredible Results!

ACELINE ACADEMY

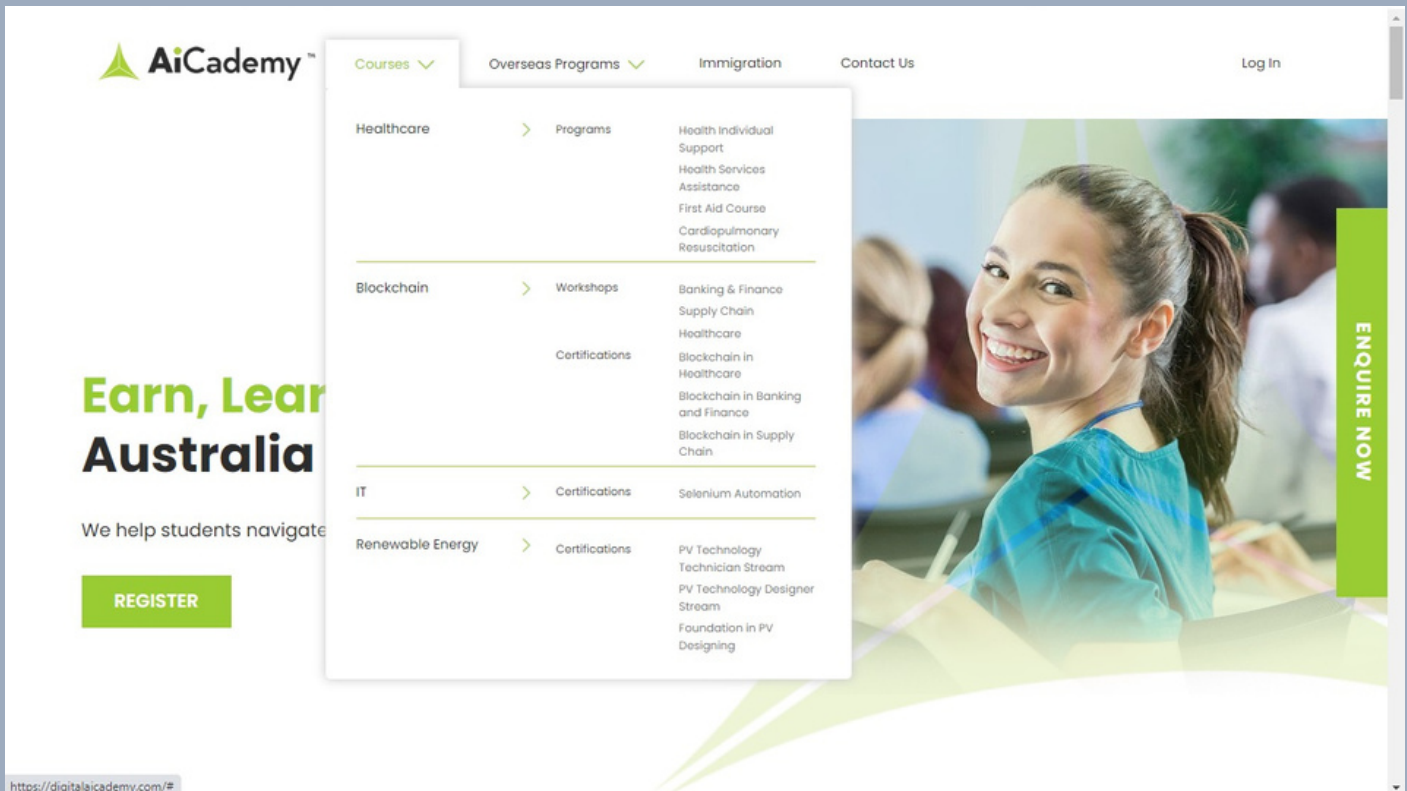

Aceline Academy is now a hybrid academy of Arts & Culture in Karnataka, India. Within four months of adopting our Learning Management System and launching it as an online academy for a global audience, they increased their student numbers by 730%, thanks to the astute marketing tools in the online software.

The teachers are the partners to the owner of the portal and earn a commission for each student subscription in their respective courses. The courses are a mix of Live and Recorded Classes with Assignments and Certifications.

From time to time, on seasonal occasions, they conduct online events on the portal to lure more students and engage the existing students and teachers alike

AICADEMY

AiCademy is an Australia-based Learning Management System Portal teaching advanced technologies, like BlockChain, Artificial Intelligence, etc. in association with several Australian universities.

We have also integrated their Enterprise resource planning software and Independent HRMS Software into this Learning Management System so that their training business and International student recruitment business system work in unison with each other.

This has led to a 270% increase in their business of recruitment of international students for Australian Universities.

BEYOND THE LIMIT OF SKY

- **"Flexible Integration with Third-Party Software"**: Our LMS has a modular architecture and can integrate seamlessly with other third-party software, making it easier for users to access all their learning resources in one place.
- **"Adaptive Learning Algorithm"**: The LMS's advanced algorithms are designed to provide a personalized learning experience to each learner. This algorithm analyses the learner's performance and adapts the content and difficulty level accordingly, helping them to achieve their learning goals faster.
- **"Customizable and Scalable"**: The modular architecture makes it easy to customize and scale the system as per the needs of the organization. This makes it a perfect fit for businesses of all sizes, from small startups to large enterprises.
- **"Mobile-friendly Interface"**: The LMS's interface is designed to be mobile-friendly, enabling learners to access their courses on the go, from any device. This makes it easier for them to complete their courses, regardless of their location.
- **"Seamless Learning Experience"**: The LMS's algorithm and modular architecture work together to provide a seamless learning experience to users. This allows them to access their learning resources from one platform, making it easier for them to complete their courses and achieve their learning goals.
